

# Prompt to Pull Request Series Map

Use AI to accelerate development without losing scope, proof, review, or reasoning.

Prompt -> Plan -> Patch -> Test -> Review -> Record

### CORE QUESTION

- Can the team trust the path?
- Who owns the decision?
- What evidence proves it?
- Where does the why live?

### SYSTEM PARTS

- Scope
- Repo context
- Tool permissions
- Verification

### DURABLE OUTPUT

- Code
- Tests/checks
- PR reasoning
- Docs or ADRs

### SERIES PATH

- Tools and surfaces
- Prompt work orders
- AI review
- Reusable workflow
