

AI Development Loop Checklist

Keep AI-assisted implementation reviewable from plan to commit.

Plan -> Patch -> Test -> Review -> Commit

PLAN

- Inspect first
- Name changed files
- Call out risk
- Choose checks

PATCH

- Small units
- No scope creep
- Stop at checkpoint
- Keep diff legible

TEST

- Run normal checks
- Record commands
- Explain failures
- Manual smoke test

COMMIT

- Summarize why
- List verification
- Name residual risk
- Link issue
