

ChatGPT + Codex Feature Delegation Card

Use ChatGPT for shaping intent and Codex for scoped repository implementation.

Intent -> Issue -> Inspect -> Implement -> Handoff

CHATGPT PHASE

- Explore idea
- Draft acceptance
- Find risks
- Create work order

CODEX PHASE

- Inspect repo
- Follow patterns
- Edit scoped files
- Run checks

KEEP OUT

- No adjacent features
- No surprise deps
- No broad refactor
- No send/deploy

HANDOFF

- Diff summary
- Tests run
- Risks
- PR-ready reasoning
