

LATE NIGHT DEVELOPMENT

FIELD NOTES

FIELD NOTE 16

Claude Code Terminal Refactor Card

Use a terminal-first AI workflow for investigation, refactoring, and verification.

Explore -> Evidence -> Checkpoint -> Verify -> Record

EXPLORE

- Read-only first
- Search patterns
- Map command flow
- Summarize risks

USE EVIDENCE

- Paste failures
- Pipe logs
- Compare output
- Ask for smallest fix

CHECKPOINTS

- One refactor unit
- Show summary
- Run build
- Pause before cleanup

SAFETY

- Control permissions
- Avoid destructive cmds
- Protect env files
- Record session why
