# LATE NIGHT DEVELOPMENT

FIELD NOTES

FIELD NOTE 24

## How AI Learns

Understand patterns and training without treating a model like a person.

**The basic flow -> Use this when -> Reality check -> Try this tonight**

### THE BASIC FLOW

- Examples enter training
- Weights adjust toward patterns
- The model generalizes
- An answer is generated later

### USE THIS WHEN

- Someone says AI knows facts
- Comparing training data
- Explaining model limits

### REALITY CHECK

- Patterns are not experience
- Training is not a live database
- Relevance matters

### TRY THIS TONIGHT

- Pick a familiar pattern
- List its examples
- Name what a model might miss
